REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-8,14-18, and 20-22 are allowed over the references of record because none of these references disclosed or can be combined to yield the claimed invention such as a Schottky barrier diode comprising an active area; a guard ring that is one of disjointed, a non-closed loop, and missing a portion in at least one dimension; at least one separation region bounding the active area; and an electrode formed in the active area to form a Schottky junction, wherein the at least one separation region reduces parasitic capacitance about the Schottky junction, as recited in claim 1, or a necessary method of making the same, as recited in claim 14.

In Statutory Invention Disclosure H000040, Buchanan et al. disclose a Schottky barrier diode comprising an active area 12; a guard ring 22 that is spiral shaped and thus a disjointed, non-closed loop, and missing a portion; and an electrode 16 formed in the active area 12 to form a Schottky junction. However, Buchanan et al. neither discloses nor suggests at least one separation region bounding active area 12 to reduce parasitic capacitance about the Schottky junction.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
